This book is dedicated to all of the authors of The Gallery of Magick. Without their inspiration this book would never have come to be. And to Och who illuminated my dense and foolish mind with divine revelation and insight. To my beautiful magickal family on the Facebook group. And finally, to Norma, my beautiful girlfriend by whose expertise with graphic design these sigils were made possible.

Introduction

Thank you so much for buying my book. I hope that you gain knowledge, wisdom, and understanding from the material that is presented here. To me, theory is useless unless it contributes to actual magickal results. Long and drawn out explanations in magick books bore me and so even though there is some theory to cover before getting to the magick, I will try to keep it to a minimum. Therefore, this introduction will be very short.

I first discovered magick when I was going through a particularly difficult time in my life. I was lost, lonely, and afraid. I didn't believe in magick or rituals and thought it was all a bunch of nonsense that had no power and didn't work. I decided out of desperation to try the rituals from *The Mystic Grimoire of Mighty Spells and Rituals* by Geof Gray-Cobb (which has now been rereleased by his wonderful daughter VcToria Gray.) And I was blown away by the incredible energy I felt during the ritual. Results quickly followed that astounded me and continue to bear fruit for me till this day 8 years or so later. As a result of this experience I decided I wanted to know all there is to know about magick and rituals on my quest for spiritual evolution and the power to control my world.

Enter the Gallery of Magick. Most people reading this book will already know about Damon Brand and the Gallery of Magick. If you don't, do yourself a favor and go buy one of their books. You will not regret it. The Gallery of Magick is what led me to the place I am in today. With their brilliant simplification of complex magick and ingenious rituals I was able to discover just how simple magick could be while remaining effective. The value of the movement that they started in the magick and occult community is beyond human comprehension and I am convinced that the effects of their efforts will help carry this Earth into a Golden Age. But I digress.

Particularly, I was interested in Damon Brand's *Words of Power*. How could it be possible for simple words, quickly scanned and spoken, to create such immense and lasting change in our lives? I was left in the dark regarding this and gave up trying to find out the answer for many years.

Ritual to Och

It has always been a desire of mine to become a writer but I never believed it to be possible. Just for fun and out of curiosity whether it would work or not (even though we are told by The Gallery of Magick repeatedly not to do magick just out of curiosity) I did a ritual to Och as seen in the book Chaos Magick by one of my favorite authors, Adam Blackthorne.

During the ritual I asked Och to give me the power to write books that inspire the hearts of others. I did not have magick books in mind at all. I was asking for the ability to write regular fiction novels. After the ritual things felt normal. Yet, a few days later I felt a sort of inspiration to begin to try reverse engineering Words of Power by Damon Brand.

I learned some Hebrew and took to the internet to try searching the names in the book. Many of the Hebrew names I searched kept bringing me to a book called The Book of Sacred Names by a brilliant author named Jacobus Swart. I purchased that book and discovered that a lot of the names found in Words of Power could be found in The Book of Sacred Names along with a detailed explanation of their powers and usage in magickal practice. The description of their powers aligned with the powers presented in Words of Power and everything clicked together for me.

Eager to try out my newly discovered knowledge I composed a few of my own rituals in the style of Words of Power and shared them to an amazing Facebook Group I am a member of. to my surprise and delight others felt the power of the words and began to have amazing experiences using them. I was hooked and doubled my researching to try to develop more magick. I loved being able to create something of value that benefited so many people for the first time in my life.

The Development of Goetic Words of Power

I quickly realized from my research that all magick is built upon words of power. It fascinated me how easily we could raise and direct potent spiritual forces to do our bidding with simply words and lightly focused intent. I noticed that a lot of people had been asking the Gallery of Magick to develop words of power that could be used to call upon the Goetic demons and became curious whether it would be possible.

Through my research I discovered that the preliminary words in a ritual evocation to the Goetic demons was primarily for 1, protection and 2, spiritual authority. So, I compiled words that would grant us protection, increase our spiritual authority, and also direct the energies to bring us a result quickly and reliably in a way that would bend time and space to bring us our desires.

Development of the System

This system that I present to you has never been seen before on Earth. The Goetic demons and 72 angels have been categorized astrologically before as can be seen through a quick search online but never before have they been categorized in the way that I present here. The differences in my system are numerous but one of the most obvious differences is that the traditional astrological attributions begin in Kether. I was led to begin the attributions in Chokmah.

I believe this method was given to me by divine revelation. Throughout the entire process it has felt more like I was receiving this information rather than creating it myself. Often, I would receive inspirations out of nowhere and ideas that would illuminate problems I had with the chart, providing insights without any prior research. Later, when I did research to confirm what I was being shown, my insights proved to be true and valid.

This is where I describe this system that has been revealed to me. This section also is not necessary to read. You can still use the powers and ritual as written and achieve the same results. The beauty of this system that has been revealed to me is that it liberates us from having to use and reuse the same old powers of the 72 demons, 72 angels, and 72 names of God as written in the old grimoires and allows us to discover our own powers for these spirits. But to do so we must understand what is called astrological aspects.

What you see in the previous chart is how the names of God are traditionally laid out. Reading from right to left, in 9 rows of 8 names. I was inspired to begin at Chokmah going down the right

side and list the name of the sephiroth in order. The next one down would then be Binah, the next one down, Chesed, etc. This pattern continues down the right side until the last row, which is assigned to Malkuth.

I then was inspired to write the names of the Sephiroth across the top in the same way with Chokmah being the first box, Binah the second, Chesed the third, etc. across the top until the last box is assigned to Yesod.

I didn't understand why I was led to do this until I began to read up on the powers of each of the names of God as given in a wonderful chart that I discovered on this website: <https://www.kabbalahinsights.com/en/products/digital-items> It is the chart with the blue background. This chart lists the powers of each of the names of God in a way that I had never seen before.

As I read the names of God written on the poster and considered their powers in relation to their position on the chart I had been guided to create, I saw that to my surprise the powers matched their respective Sephirah perfectly! Each of the Sephiroth are ruled by a particular planet.

Chokmah = Neptune

Binah = Saturn

Chesed = Jupiter

Geburah = Mars

Tiphereth = Sun

Netzach = Venus

Hod = Mercury

Yesod = Moon

At this point I realized how the chart worked. The names in each box revealed the combined powers of both names that intersected in the box. For example, box 1 is ruled by Chokmah and Chokmah. Box 2 is ruled by Binah and Chokmah. Box 20 is ruled by Chesed and Geburah, etc. So when you combine the planetary powers of each of the Sephiroth that rule that box and you compare it to the powers listed for the Name of God, angel, or demon you discover that their powers align with the combined influence of the 2 Sephiroth perfectly.

This is only possible to understand though when you have a detailed explanation of the powers of each spirit. For the names of God, I prefer the explanation of that chart I gave a link to above on the Kabbalah Insights website. For the powers of the 72 angels, I prefer the powers as listed in the book by Papus called The Qabalah. And for the 72 Demons surprisingly, the original Goetia book written in Olde English by Johann Wier in 1583 gives the most revealing description of their powers when using this system. Of course, you also cannot go wrong with Gordon Winterfield's amazing enlightening interpretation and of the powers of the 72 demons either.

Ariel's Inspiration

So, I thought that the entire system was complete until one day during a time I was working with the angel Ariel (#46) he whispered in my ear a single word, "trine". Now, I had no idea what that word meant so I do what any self-respecting person does when they encounter something they don't know, I Googled it! I was shown that there are three major astrological positions (actually 5 but trine/sextile and square/opposite are often combined since they are so similar in effect). The 3 positions are Conjunct, Trine/Sextile, And Square/Opposite.

Ariel showed me that the names of God are associated with the Conjunct aspect. The 72 angels are associated with the Trine/Sextile aspect. And the 72 Demons of the Goetia are associated with the Square/Opposite aspect. When I looked up the aspects on various websites, I discovered that it was true. The powers of the names, angels, and demons existed exactly with the powers associated with the planetary aspects to which they were assigned. This was a thrilling discovery for me and me at once knew I was onto something huge and revolutionary!

For example, the angel Menadel (#36) is associated with the Sun trine/sextile Mars position. Sun trine/sextile Mars people are passionate, determined, competitive, aggressive, hardworking, and confident. When we look up the powers of Menadel, we see that he brings courage, banishes fear, and helps us to work hard and retain our employment as well as liberating those who are in bondage, etc. His powers tie into that astrological position. This is just a brief example and I will be exploring this in more depth in future books.

Birth Chart and Patron Names, Angels, and Demons

Further revelations continued from there. For example, I learned that we could use this information to discover our patron angels and demons based on the planetary aspects we held in our birth chart. If you want to discover your patrons right now you must first create your birth chart on this free website <https://astro-charts.com/>. Here you will be able to quickly create a chart that shows you what planetary aspects are present in your birth chart and from there you can simply match them up with the names on the chart.

Remember, there are three positions in each box. The top position is the Name of God and is associated with the Conjunction positions. The middle position is the name of the angel and is associated with the trine/sextile position. And the bottom position is the name of the demon of the Goetia and is associated with the square/opposite position.

Be aware that not all planets are covered in my chart. My chart covers the 8 basic planets. If you come across a planet that isn't covered in my chart, simply ignore it and move on to the next one. Perhaps in the future I will discover what matches with those other planets if anything. Maybe you will discover it. Who knows? This system is entirely new and is still developing so I am open to feedback and advice from readers.

Also, when it says, for example Saturn trine Sun, or Saturn sextile Sun, in this system it is the same thing. The same applies for square and opposite.

North Node

This is something that I did not invent but it is an idea that I haven't seen anyone else really talk about much. Your North Node shows you what your goal or mission is in this life. I am planning to write a book on this. This brief snippet might leave you a bit confused, but I am throwing this in there just to spark your imagination and ideas.

The North Node has three positions, called Decans. Each Decan has an angel, called Angels of the Decans. Because there are 12 possible North Nodes, 3 Decans for each node, there are of course, 36 Angels of the Decans. So, if your North Node is in Aries for example, you will have 3 Angels of that Decan that you may call on for aid and assistance in developing your mission in life. I intend to publish a book that lists all 36 Angels of the Decans including their powers and their associated tarot card that allows you to call on them.

I also intend to write a full book on finding your patrons that discusses the aspects more in depth and lists the corresponding Name of God, angel, or demon and discusses how they relate.

On an unrelated note, in my studies I was able to create a correspondence of the 72 Rays of God with the ancient Chinese Bagua. This one is very experimental, and I have hardly begun to understand all the implications of its correspondences, but I thought I would include it here for greater minds than my own to chew on and maybe make some sense of it.

Goetic Words of Power Method

When you work with Goetic Words of Power you are not only summoning the powers of the demon but you are also calling to your aid the powers of Names of God as well as angels such as Metatron, Raziel, and others that add great effectiveness to the ritual.

Some people also may be worried about calling on these demons without protection. Rest assured, this is one of my concerns as well. Coming from a Christian background I never quite let go of the fear of calling on supposed "demons", so I built extensive safety into the ritual itself. All the angels that one would call in the traditional protective circle ritual are included in the Goetic Words of Power. As you say the names you are simultaneously stepping into a field of divine authority to command spirits and a field of protection.

Because of this, you may or may not even feel the presence of the demon. Rest assured, the demons will hear you loud and clear and be ready to cooperate with you when you call to them using this method. The names you are calling on also are well known to bring you the favor of humans and spirits alike so using this method actually brings harmony to your physical and spiritual life on a number of levels and quite rapidly. So even if you don't immediately perceive the change you asked for, you will most likely notice your life flows more easily or you are in a much better mood than you were in previously.

If you are interested in learning the meaning and origin of the names buy Jacobus Swart's Book of Sacred Names. Also, for the names taken from the 72 Names of God, you will find their powers listed in Zanna Blaise's wonderful book 72 Sigils of Power.

I am obligated to state that any power you see here can be inverted and used for black magick. Which means that for the perceptive person, this entire book can be seen as an extensive grimoire of black magick. For example, we see that Agares under the 4th House of Home has the power to "Restore balance when our security in life has been destroyed." This means that he can also destroy security in someone's life so that they are thrown off balance. Anything that a spirit can do, they can also do the exact opposite.

The inspiration for the powers shown has been taken from this website <http://www.astrology-x-files.com/transits/>. As you can see if you care to browse that site, to discover the "astrological powers" of the demons in each house of the Zodiac, I have simply read what was on that page and wrote how the demon could solve the problem presented. So, if that website says, "relationships may be strained at this time," then I wrote that the demon has the power to, "heal strained relationships."

I appreciate when writers reveal their sources and tell how they discovered the powers for each spirit so here I am revealing my sources so that my readers can not only understand where I got the various powers that I list but also discover new powers on your own. That is the beauty of this system!

One of the most common questions when it comes to evoking spirits is how do we understand what powers the spirit has or how did the original writers discover the powers of the spirit? This system I present here for the first time in history (as far as I know) reveals how we can not only understand the given powers of a spirit on a deeper level but to discover and experiment with new powers for those spirits based on the planetary aspect they belong to!

When we work with spirits, we often fall into a rut of believing that the spirit only has a single power and isn't capable of more than is written in the grimoire about it. For example, if it says a spirit causes love between men and women, we think that the spirit is only good for causing love and maybe sex. Yet real life is never so cut and dried. Real people are never so one sided either.

I, for example, work at a contact center. If I was in a grimoire they may say I "aid in communication." But working at a contact center has also taught me about managing money, having discipline and patience, endurance, human psychology, how to get promoted in a corporation, etc. So, I could also teach others all of those things. It is the same with spirits we see in grimoires. In order to find their powers, we must contemplate their astrological position as shown in this system and read their traditional descriptions and imagine what other powers might be available to us from what we read there. This one paragraph can completely change your experience and understanding of working with spirits.

I am only touching briefly here on this because I will write more in depth on this in future books and may even host classes online that explains this information that has been revealed to me more in depth.

Here I will discuss very briefly the technique of using these calls. It is very easy to learn and apply. Each of the Goetic Demons has 4 angels that we call on before we call to the actual demon. Listed below the sigil of each demon you will find the names of the 4 angels as well as the name of the demon below them.

Be aware, the powers listed for each demon are only a suggestion. This ritual will work using any power ascribed to the demon from any system. This has been tested and proven to be true.

The first part of the call remains the same for each demon. Only the last 5 names change, that is, the names of the 4 angels, and of course the name of the demon. Here is an example of the ritual:

The Ritual Method for Goetic Words of Power

1. Tune in to how you are feeling in your current state. Feel what brought you to this magick regardless of what it is. Breathe and tune into your current state of being.

2. Feel what your desire is and feel that sensation of lacking your desire. How does it make you feel emotionally? Allow those emotions to arise fully and without restrictions.

3. Begin to scan the sigil. Starting at the top middle (start at the Hebrew letter that the tip of the triangle is pointing to at the top of the circle), scan the outer circle counterclockwise. When done, scan the triangle starting from the bottom right, to the top of the triangle, then down the left side. Then right to left on the bottom.

4. Gaze at the sigil of the spirit in the center of the triangle and know that therein lies the power to resolve whatever problem you have. To fulfill whatever lack, you are feeling. This sigil is bursting with power to help you and a desire to do so. Feel a sense of gratitude welling up for that.

5. Say the words:

AH-DOH-NAI
EE-AH-OH
YICH-EH-AK-EV-CAH-HA
YITZ-OH-HAH-YAHV-TAH-HAH
YEE-YAH-HAH-GAV-LEE-HAH
GAH-DEE-YELL
TOO-VEE-YELL
OO-REE-YELL
RAH-FAH-EL
MEE-KAH-EL
GAH-BREE-YELL
YUH-DID-YAH
RAH-ZEE-YELL
YEH-OH-EL
NOO-REE-YELL
YAH-BAHM
EE-AH
OH-MEM
VEH-HOO

(the above names remain the same in every ritual so you may want to write them down on a separate sheet of paper or keep them on a separate screen to read them. The names below are the names of the four angels and the demon that will change with each ritual. In this case, for Paimon they would be):

HEH-ZEE-EL
HAH-EH-VAH-LEE-EL
ZEE-YEE-EL
YEH-NAH-EL
PAY-MON

(after saying these 5 names you would complete the rest of the ritual by saying the words below and changing only the name of the demon)

Hear me Paimon!

It is my will that you _____. (state your will 3 times in 2 sentences or less)

Paimon! I will give you public praise as a reward upon fulfillment. So that others may hear of your power and call upon you. Go in peace and cause no harm or loss to myself or my loved ones.

Hayah! Hoveh! Yiyeh! Shalom!
(and that is the end of the ritual.)

A note for those who are concerned about safety:

My intention was to build the protection into the ritual. All the angels in the Circle of Power ritual by The Gallery of Magick are in there. The name IAO is powerful for protection and controlling spirits. If those two things weren't enough, I also included a series of angels in here that correspond with a name of God that causes others (including spirits) to find you agreeable and to do your will. And finally (and perhaps most importantly) I included the angels that guide and restrain the demon.

They are the names surrounding the triangle, the Shem angel and its emissary angels.

I also included the command that the spirit does not harm either us or our loved ones or cause any loss to occur. I sealed all of that protection and power into this ritual with the words of power Hayah, Hoveh, Yiyeh, and Shalom (peace and harmony). So, in this ritual you have divine authority, angelic protection, the favor of humans and spirits, and a seal of divine peace built in. I'd say it's safe. But your experiences may vary so still, use your own judgments and use the magick at your own risk.

If you have any trouble or any questions regarding performing the rituals, I intend to start an online study group where we can share our experiences and talk about the rituals or ask questions.
